

COLORADO'S POWER PATHWAY

| Winter 2022 Public Open Houses

Xcel Energy continues to make progress identifying potential locations for Colorado's Power Pathway. Please join us at one of our upcoming in-person public open houses to provide input about our revised transmission line routes and substation site options. Project staff will be available to provide information about transmission line routing activities and answer questions about the new transmission line project, including the overall timeline, route options, construction processes and topics related to easements and right-of-way. We want to hear from you about this important project and any issues we should consider in your area.

Visit our [Events page](#) for full meeting details. No formal presentation is planned, so please attend at any time during the open house. If you are unable to attend, meeting materials and an electronic comment form will be posted on our website.

Meeting Schedule

- Jan. 24, **Platteville**: Community Center, 4-7 p.m.
- Jan. 25, **Fort Morgan**: Field House, Gym 3, 4-7 p.m.
- Jan. 26, **Akron**: Washington County Event Center, 4-7 p.m.

Note about COVID-19: If local, state or corporate guidance prevents in-person meetings

or affects venue capacity, these open houses may be rescheduled or moved to an online format. Please check our website or call **855-858-9037** for up-to-date information.

| Colorado's Power Pathway

Colorado's Power Pathway is a proposed \$1.7 to \$2 billion investment to improve the electric grid and enable future renewable energy development around the state. Colorado's Power Pathway includes approximately 560 to 650 miles of new 345-kilovolt electric transmission line and several new and expanded substations. If approved, segments of Colorado's Power Pathway could begin construction in 2023 and begin operating as early as 2025. The new infrastructure will increase electric reliability, connect new energy resources in eastern Colorado, boost the regional economy and create jobs during construction.
