

COLORADO'S POWER PATHWAY

| Fall 2021 Public Open Houses

Thank you to everyone who attended our October and November public open houses. We appreciate your feedback as we identify transmission line route options and substation sites. If you were unable to attend:

- Review our [library](#), which includes meeting materials and fact sheets, or browse our [frequently asked questions](#).
- Provide feedback using our [comment form](#) no later than **Wednesday, Nov. 24, 2021**.

Additional public open houses will be held in early 2022 to gather feedback on our revised transmission line routes and substation site options. A detailed meeting schedule will be available on our website in the coming weeks.

| Updated Interactive Project Map

Our interactive project map has been updated to highlight project focus areas and substation siting areas, areas where the preferred transmission line route and substation sites could be located. Each segment focus area is outlined in a different color and includes preliminary transmission line links in yellow. The number of preliminary transmission line links will be narrowed down until a single preferred route is identified.

[GO TO INTERACTIVE MAP](#)

Click and zoom in on the map to see detailed views of Colorado's Power Pathway focus areas. To look up a specific address, type it in the search bar at the top of the map. You can also view detailed segment overview maps in the [library](#).

| Colorado's Power Pathway

Colorado's Power Pathway is a proposed \$1.7 to \$2 billion investment to improve the electric grid and enable future renewable energy interconnections around the state. Colorado's Power Pathway includes approximately 560 to 650 miles of new 345-kilovolt electric transmission line and several new and expanded substations. If approved, segments of Colorado's Power Pathway could be operating as early as 2025. It will increase electric reliability, connect new energy resources in eastern Colorado, boost the regional economy and create jobs during construction.
