

COLORADO'S POWER PATHWAY

| Interactive Map Updates

Our [interactive map](#) has been updated with the proposed locations for Goose Creek and May Valley substations. The Goose Creek Substation location is near the intersection of County Road DD and County Road EE in Cheyenne County. The May Valley Substation location is near the intersection of County Road G and County Road 61 in Kiowa County. Each new substation and the proposed transmission line route will be included in the land use permit application submitted to each county in the coming months.

| Segment 5 Public Open Houses

Xcel Energy continues to make progress identifying the preferred transmission line route for Segment 5 of Colorado's Power Pathway. Final route selection will incorporate link-specific feedback received from landowners, community members and other project stakeholders. Updated project maps showing the preferred transmission line route will be available at [ColoradosPowerPathway.com](https://coloradospowerpathway.com) by the end of April.

Please join us at one of our upcoming Segment 5 in-person public open houses to provide input on our preferred route and substation locations. Project staff will be available to provide information about transmission line routing activities and answer questions about the new transmission line project, including the overall timeline and construction process, and topics related to easements and right-of-way. We want to hear from you about this important project and any factors we should consider in your area.

Visit our [Events page](#) for full meeting details. No formal presentation is planned, so please attend at any time during the open house. If you are unable to attend, meeting materials and an electronic comment form will be available on the project website.

Segment 5 Meeting Schedule

May 2, **Aurora**: Arapahoe County Fairgrounds Main Hall B, 4-7 p.m.
May 3, **Kiowa**: Elbert County Fairgrounds Exhibit Building, 3-7 p.m.
May 4, **Simla**: Big Sandy Schools Cafeteria, 5-7:30 p.m.
May 5, **Yoder**: Edison School District Cafeteria, 5-7:30 p.m.

Note about COVID-19: If local, state or corporate guidance prevents in-person meetings or affects venue capacity, these open

houses may be rescheduled or moved to an online format. Please check our website or call **855-858-9037** for up-to-date information.

About the Project

Colorado's Power Pathway is a proposed \$1.7 to \$2 billion investment to improve the electric grid and enable future renewable energy development around the state. Colorado's Power Pathway includes approximately 560 to 650 miles of new 345-kilovolt electric transmission line and several new and expanded substations. If approved, segments of Colorado's Power Pathway could begin construction in 2023 and begin operating as early as 2025. The new infrastructure will increase electric reliability, connect new energy resources in eastern Colorado, boost the regional economy and create jobs during construction.
